

George Georgiou CV

George Georgiou was born in Limassol in 1974. He specialized in Electrical Engineering and obtained a Bachelor and Master degrees of Business Administration. He started his career in 1999 with GGAM Electrical Services Ltd. His vision for diversification in the "smart buildings" sector and constant evolution in the wider energy market led him to work with the German company, a huge company in the photovoltaic industry, Conergy, establishing Conergy Cyprus in 2006, among the first companies in the sector in Cyprus and the world market. Next step in 2011 was the cooperation with Lanitis Group of Companies and the establishment of Lanitis Green Energy Group, which he was a shareholder and held the position of Chief Executive Officer. The LGEG group was made up of specialized companies, all of which were active in the green energy market in Cyprus, and it was a market leader. The next move was the creation of a strategic alliance with a group of investors and the establishment of CY PV Energy Ltd, which designs and executes the installation of photovoltaic parks while actively contributing to the process of attracting foreign investors. Following the successful implementation of the 3 Photovoltaic Parks with a capacity of 7.4MW, it is developing and investing another 8 PV Parks with a capacity of 25MW with a total investment value of 25 million Euros.

In 2014, he created the first tire recycling plant in Cyprus. He is currently participating in the creation of the Energy Fund, a special investment fund for RES and CFR projects, of which he is Executive Director.

As a transformation of the Lanitis Green Energy Group, George Georgiou, focusing on the evolution and adaptation to changes in the energy market, creates the new GDL Green Energy Group, a flexible scheme consisting of specialized companies providing renewable energy products and services.

Georgios Georgiou has been working exclusively for the last 16 years with the sector of Renewable Energy Sources and Energy Saving. He has served as Chairman of the Renewable Energy Sources Association for 12 years. He also served as a member of the Limassol Chamber of Commerce and Industry (EBEL).

Today he is:

- Chairman of Cyprus Association of Energy Saving Enterprises (PASAEEX)
- Vice President and Member of the Employers and Industrialists Federation Executive Board (OEB)
- Member of the Board of Directors of the Energy Office of Cypriot Citizens (CEA)
- Member of the Board of Cyprus Institute of Marketing (CIM)
- Chairman of the Energy Committee of OEB

He is married and proud father for his son Andreas.
