

## **Antri Constantinou**

Antri Constantinou is a Chemist, graduated the University of Cyprus and holds an MSc in Green Chemistry and Sustainable Industrial Technologies.

She began her career in 2012, with research on sustainable industrial production and how to measure the optimization of the production process at the Center for Green Chemistry Excellence in York, UK, developing a holistic measuring toolkit with applications in business in the pharmaceutical industry. Then she worked as a sustainability officer at the London Fire Department, managing the environmental impact and applying the principles of sustainability and circular economy to the structure of the organization, as well as in the procurement practices. Then she started working as a Circular Economy Consultant initially at the Advance London (ReLondon / LWARB), providing consulting and business coaching services to small and medium-sized businesses based throughout London to support SMEs to develop circular products and services and transition to more circular business models. Then she moved to Cyprus where she started as a Business Consultant at PwC Cyprus, offering services for certification with management systems (eg ISO 14001, ISO9001), in corporate social responsibility, creation of procurement strategies.

She has 4 scientific publications and she is the author of a chapter in a book in the context of green chemistry, sustainability and the circular economy. From June 2020 she was an external expert of OEB for issues of circular economy and sustainability and in April 2021 she joined the Department of Energy & Environment of OEB.
