

Curriculum Vitae
STELLA PARMAKI

Stella Parmaki holds a degree in Environmental Science and Technology and a PhD in Chemical Engineering, specializing in Environmental Biotechnology, from the Cyprus University of Technology. Her research activity has focused, among other areas, on the development of innovative microbial methods for utilizing waste from the food industry. Her scientific work is reflected in publications in international scientific journals in the fields of bioprocessing, bioeconomy, and industrial waste management.

She has significant experience, having worked as a Researcher at the Environmental Bioprocessing Laboratory (2016-2019), as a Teaching Assistant (2018-2019), and as a Special Teaching Staff member (2019) at the Cyprus University of Technology, specializing in environmental management and environmental biotechnology. Additionally, she has experience in the private sector, having worked as an Analyst/Researcher (2021-2022).

She holds multiple certifications in sustainability and environmental management, including ISO 14001 (Environmental Management Systems), ISO 14064-1&2 (Greenhouse Gas Emissions Management), as well as Circular Economy Management (Circular Economy Alliance).

Since 2022, she has been working as an Officer in the Energy and Environment Department of the Cyprus Employers & Industrialists Federation, actively contributing to the green transition of Cypriot businesses.
