**Subject:** Exclusive Opportunity: Connect with Romania's Energy Decision-Makers at REW 2025

Dear Sir/Madam,

With the support of the **Ministry of Energy of Romania** and leading industry associations, the team behind **Energy Expo®** - the most important energy fair in S-E Europe - is proud to announce **Romanian Energy Week 2025**, taking place **17-21 November 2025** at the **Palace of Parliament – Human Rights Hall, Bucharest**.

Romanian Energy Week (REW 2025) is a high-level, invitation-only summit designed as a **roundtable format** for direct dialogue with government officials, regulators, and senior executives from Romania's most important energy companies. Participation is limited to **60 seats at the main table** and up to **150 participants in the auditorium**, ensuring an exclusive and focused environment.

We kindly invite your Commercial & Economic Section to inform companies from your country that are:

- exploring opportunities to **enter the Romanian energy market**,
- already established in Romania and seeking **new partnerships or policy insights**, or
- interested in **understanding the market in more detail**.

We are delighted to extend an **invitation for one representative of your Embassy** to attend and actively engage in the discussions throughout the five days of the summit. Should you consider it more suitable, you may delegate **different representatives for each day**. Furthermore, we will share detailed updates about the agenda, and on the day when we confirm the participation of the Minister of Energy, it would be an honor if **H.E. the Ambassador** could also join the discussions.

Each day of REW 2025 is dedicated to a strategic theme:

- Nov 17 – EPC in Focus: From Design to Delivery
- Nov 18 – Green Energy: Investing in the Inevitable
- Nov 19 – Energy Storage: Power in Reserve
- Nov 20 – Tradition & Innovation: Modernizing the Backbone
- Nov 21 – Finance & Consulting: Turning Projects into Deals

The week concludes with the **Romanian Energy Awards Gala**, an evening celebrating excellence, innovation, and leadership in the energy sector.

We would be pleased to share the full presentation of the event, please find attached, and discuss how companies from your country can benefit from participating in REW 2025.

Thank you in advance for your valuable support in connecting international businesses with Romania's energy future.

Best regards,  
Nicoleta Maxinoaei

## ROMANIAN ENERGY WEEK

### WHO ARE WE?

We are the team behind ENERGY EXPO®, the fastest-growing energy event in Southeast Europe — a platform where innovation, business, education, and community meet. In 2025, we brought together over 280 exhibitors, specialists and speakers from 30+ countries and more than 9,150 visitors, hosting 14 major conferences and launching the region's first CleanTech Hackathon, in partnership with Techcelerator .

ENERGY EXPO® was the first industry event developed in close partnership with the Romanian Ministry of Energy, establishing a new model for public-private cooperation in the sector. In 2025, we brought together, for the first time on the same stage, the Ministers of Energy of Romania and the Republic of Moldova — marking a historic step toward regional dialogue and cooperation.

We aim to create environments where real dialogue leads to real impact — bridging business, government, and innovation to accelerate progress in the energy sector. Romanian Energy Week builds on this experience with a sharper focus: limited participation, high-level exchange, and strategic outcomes.

### What is Romanian Energy Week?

REW is a strategic meeting point for those who actively shape the future of energy in Romania and the region. Built around curated, high-impact roundtable discussions, the summit offers a rare opportunity to engage directly with decision-makers from government, regulators, and the most relevant companies in the market. With limited seats and a curated audience, the format fosters direct, results-driven dialogue. For companies seeking market insight, policy influence, or strategic partnerships, this is where it happens. The week will conclude with the Romanian Energy Awards Gala, honoring excellence and leadership across the Romanian energy sector.

### Why?

The purpose of Romanian Energy Week is to connect the right people, at the right time, to tackle Romania's most urgent energy priorities. By creating a focused environment for exchange, the event helps transform strategic intentions into real-world progress. It's where collaboration leads to action.

Thematic Overview: 5 DAYS OF ENERGY DIALOGUE

**NOV 17 - EPC in Focus: From Design to Delivery**

Romania is entering a new phase of energy development — how can companies position themselves to deliver faster and better in a market full of opportunity?

**NOV 18 - Green Energy: Investing in the Inevitable**

Romania holds some of the region's strongest green energy potential — how will your company help turn it into real, scalable projects?

**NOV 19 - Energy Storage: Power in Reserve**

With flexibility becoming essential to grid stability, Romania is preparing the ground for storage — so who will lead the way in shaping this emerging market?

**NOV 20 - Tradition & Innovation: Modernizing the Backbone**

Few countries have Romania's energy heritage — how can we combine legacy strengths with next-gen tech to build a smarter, cleaner future?

**NOV 21 - Finance & Consulting: Turning Projects into Deals**

Major funding is flowing into the energy sector — how can well-prepared companies and advisors turn this momentum into bankable, long-term success?

Event location: Palace of Parliament

Taking place inside the iconic Palace of Parliament — the largest and most remarkable legislative building in the world — the summit will be hosted in the prestigious Human Rights Hall. With its high ceilings, grand architecture, this venue has been the stage for some of the most important international policy dialogues in Romania.

Designed for high-level dialogue, the venue features an exclusive round table setup for 60 participants, fostering a focused and collaborative atmosphere. Held in an intimate and carefully managed setting, the event limits access to a select audience, with the hall offering a total capacity of 150 seats.

State-of-the-art facilities, including a professional simultaneous translation system, ensure seamless communication and engagement for all attendees. This exceptional setting not only elevates the quality of discussions but also reinforces the summit's commitment to strategic, results-driven dialogue essential for shaping Romania's energy future.
