 Country : Spain

Project ID : P0062666/0001 Project Established

ICS :

National Ref : PNE 202009-28

Title : Methodology for verification and inspection of low voltage electrical installations at communal facilities.

Scope : This standard is intended to provide criteria for the verification and inspection of low-voltage electrical installations in public premises:

- by providing a methodology for verification/inspection; and
- by providing documentation for recording the conditions and values of the verification/inspection (non-conformities observed, damage, deterioration and hazardous conditions, etc.).

The results of the verifications/inspections must define the corrective actions to be taken to comply with the minimum safety requirements for this type of installation.

This standard applies to all electrical installations in public premises.

Public premises may include special-purpose premises whose electrical installations are affected by ITC-BT standards other than ITC-BT 28 (e.g. operating theatres and procedure rooms, etc.). For such installations, the relevant parts of the UNE 202009 series of standards must also be used.

Title : Methodology for the verification and inspection of low voltage electrical installations in operating theatres and intervention rooms.

Scope : This standard is intended to provide criteria for the verification and inspection of low-voltage electrical installations in operating theatres and procedure rooms:

- by providing a methodology for verification/inspection; and
- providing documentation for recording the conditions and values of the verification/inspection (non-conformities observed, damage, deterioration and hazardous conditions, etc.).

The results of the verifications/inspections must define the corrective actions to be taken to comply with the minimum safety requirements for this type of installation.

This standard applies to electrical installations in operating theatres and procedure rooms covered by ITC BT 38 of the REBT of 2002, whether they are powered by an isolation transformer or not (group 2 or group 1).

This standard also includes checking the maintenance logbook for the checks to be carried out before and after the installation is put into service.

Operating theatres and procedure rooms may be included in locations affected by ITC-BT standards other than ITC-BT 38 (e.g. public buildings, etc.). For such installations, the relevant parts of the UNE 202009 series of standards must also be used.
